PsychiatryOnline.org

is the platform for all American Psychiatric Publishing (APP) journals, DSM-5®, and bestselling textbooks, as well as APA Practice Guidelines, and continuing medical education. This is a one-stop resource for information on psychiatric diagnosis, treatment, guidelines, the latest research, and breaking news from the field. From a single location, users can search across all books and journals to find the most relevant content easier than ever.

Features & Benefits

Mobile Pairing
Coming Spring 2015

Search
The POL site has global search and browse options across books and journals. Tools are available to filter search results by title, type of content, topic and/or date.

Related Articles
On the article page, highly relevant additional resources will appear including related articles from journals, Psychiatric News, related chapters from books and DSM-5®, and related content from PubMed and other external sources.

Journal Redesign
We are enhancing the readership experience of our Journals with bold new looks and engaging features! Each issue’s Table of Contents will include quick takeaways for each article to help readers quickly determine items to turn to or mark for later reading.

- Journal homepages will push the latest articles front and center as soon as they are published so that cutting-edge research articles are immediately discoverable.

- Symbols on the Table of Contents page and on the articles themselves will help readers navigate to content that addresses the Core Competencies as defined by the Accreditation Council of Graduate Medical Education (ACGME) and the American Board of Medical Specialties (ABMS).

- More video content! Journal editors discuss the decisions that led them to accepting various research papers and also highlight the clinical significance of content contained in each issue.

The American Journal of Psychiatry

Official Journal of the American Psychiatric Association

Editor-in-Chief: Robert Freedman, M.D.

The American Journal of Psychiatry is the most widely-read psychiatric journal in the world. Published monthly, it is an indispensable journal for all psychiatrists and other mental health professionals who need to stay on the cutting edge of virtually every aspect of psychiatry. Reviews and overviews help to prepare for recertification and original research provides information on the latest advances in diagnosis, treatment, neuroscience, and patient populations.

Features:

AJP in Advance
As part of the Journal's commitment to bringing the latest research to the field faster, research articles now appear online in advance of their appearance in a print issue.

Treatment in Psychiatry Series
Leading experts provide a hypothetical case vignette on a commonly encountered issue in patient care followed by a summary of the relevant research literature, plus offer recommendations of how to proceed with assessment and treatment.

AJP Audio
Each online issue includes a 30-minute downloadable .mp3 format program that contains highlights and selected findings from the issue.

Clinical Case Conference Series
Complements the Treatment in Psychiatry series by presenting actual patients (with disguised identities) who pose especially difficult or unique problems in diagnosis and treatment.

Residents Journal
Each online issue is also accompanied by a FREE electronic publication produced specifically by and for psychiatry residents to share ideas and experiences regarding training, clinical practice, research, and careers.

The American Journal of Psychiatry is committed to keeping the field of psychiatry vibrant and relevant by publishing the latest advances in the diagnosis and treatment of mental illness. The findings presented in this journal explore the full spectrum of issues related to mental health diagnoses and treatment with editorials which place the most ground-breaking research into clinical context.
Highlights:

- The American Journal of Psychiatry (AJP) has an Impact Factor of 14.721 according to the recently released 2012 Journal Citation Reports® (Thomson Reuters, 2013), placing it in the top 1% of all scientific, medical, and technical journals.

- The American Journal of Psychiatry is among the top journals in psychiatry in terms of immediacy according to Thomson Scientific’s Immediacy Index. This important performance metric is calculated by dividing the number of citations to articles published in a given year by the number of articles published in that year. The Immediacy Index is a good measure of how quickly a given journal’s articles are cited—AJP’s placement is a result of publishing articles that are relevant, covering current “hot” topics and cutting-edge research, and getting these findings to the field faster with AJP in Advance, the Journal’s publish ahead-of-print protocol.

- The editors of NEJM Journal Watch Psychiatry announced the top 10 psychiatry stories of 2013. These stories were chosen by the editorial board, with an eye toward relevance to clinical practice in several areas of psychiatry. Six articles from The American Journal of Psychiatry were honored.

- A recent poll conducted by the BioMedical & Life Sciences Division of The Special Libraries Association identified the 100 most influential journals in all of Biology & Medicine over the last 100 years. The American Journal of Psychiatry was among those honored, the only psychiatry/psychology journal represented.

- CME - CME credit is available with individual subscriptions. Institutional subscriptions do not include CME credit, however institutions can purchase access to CME activities for their patrons. Please contact institutions@psych.org for more information.

No other psychiatric journal reaches more psychiatrists with greater impact or immediacy than The American Journal of Psychiatry, the journal that the overwhelming majority of psychiatrists consider essential. Each issue covers:

- **Disorders**  
  Substance abuse, childhood psychopathology, mood disorders, and personality disorders

- **Treatment**  
  Psychopharmacology, psychotherapy, and ECT

- **Neuroscience**  
  Brain imaging, genetics, and molecular biology

- **Patient Populations**  
  Women, the elderly, children, and veterans

Psychiatric Services
A Journal of the American Psychiatric Association
Editor: Howard H. Goldman, M.D., Ph.D.

Psychiatric Services, established in 1950, is published monthly by the American Psychiatric Association. The journal focuses on issues related to the delivery of mental health services, especially for people with severe mental illness in community-based treatment programs.

Each month, Psychiatric Services features 15 or more research reports with results that have practical applications in the diverse settings where today’s practitioners work. The journal has long recognized that providing high-quality care involves collaboration among a variety of professionals. Authors of research reports include psychiatrists, psychologists, pharmacists, drug and alcohol treatment counselors, social workers, nurses, economists, and professionals in related systems, such as welfare and criminal justice systems.

Monthly columns keep readers up to date on important developments in areas such as law and psychiatry and evolving best practices in service delivery. Issues feature book reviews, news, and letters to the editor. Every member of the treatment team will find Psychiatric Services a valuable source of information.

PS in Advance
Official published versions of articles are published online ahead of their appearance in a print issue. Upon online publication the article’s metadata is delivered to the National Library of Medicine so that days later, the article is available in MEDLINE and discoverable via PubMed. This means articles now enter the scientific literature in weeks rather than months.

The Journal of Neuropsychiatry and Clinical Neurosciences

The Official Journal of the American Neuropsychiatric Association

Editor: Stuart C. Yudofsky, M.D.
Deputy Editors: David B. Arciniega, M.D., and Robert E. Hales, M.D., M.B.A.

As the official journal of the American Neuropsychiatric Association, the society of psychiatrists working at the interface between neuroscience and behavioral disorders, The Journal of Neuropsychiatry and Clinical Neurosciences is dedicated to advancing effective diagnosis and treatment options for patients with neuropsychiatric disorders.

The Journal of Neuropsychiatry and Clinical Neurosciences publishes peer-reviewed articles addressing critical research areas such as Alzheimer’s disease, traumatic brain injury, Parkinson’s disease, epilepsy, and seizure disorders, and is devoted to reporting discoveries in clinical neuroscience that are relevant to understanding the brain-based disorders of patients.

The journal features original articles, concisely written clinical and research reports, perspectives on emerging trends in the field, and classic pieces from the field’s rich history. Each issue commences with the latest from the outstanding signature section “Windows to the Brain.”

Psychiatric News
The Official Newspaper of the American Psychiatric Association
Editor-in-Chief: Jeffrey Borenstein, M.D.

Psychiatric News is the “one-stop” source of information for busy psychiatrists and mental health professionals. Each issue covers major news and developments on clinical and research topics that can help inform your patient care decisions. It also keeps you updated on related areas — such as federal and state laws and regulations, Medicare and Medicaid, court cases, and health care economics — that affect your practice. Clinical and research coverage includes reports on the latest developments in the full range of psychiatric disorders, as well as in psychopharmacology, psychotherapy, and other treatments.

Psychiatrists and mental health professionals are barraged with information and news from many sources each day, both electronically and through the mail. What’s important and what’s not? You won’t have to worry about answering that question if you subscribe to Psychiatric News. It is an absolute must-read for those who need to stay abreast of events in psychiatry as they happen.
